

I'm not robot!

Akali est un assassin hybride de mêlée qui peut rapidement tuer sa cible et la suivre sur une grande distance grâce à son ultime. Akali peut carry sa team surtout si elle parvient à snowball en prenant des kills en early/mid. Assez classique en toplane, on partira sur un téléport pour pouvoir effectuer des rotations sur les autres lanes ou alors retourner au top plus rapidement. En second, on ne s'en passera pas : c'est bien le flash ! Si vous n'êtes pas du genre à décaler pour aider votre team, vous pourrez opter pour l'ignite qui vous permettra de mettre une pression early supplémentaire, sécurisant le kill en toplane si vous êtes bien. Départ Début de jeu Principaux Situationnel Pour le start, surtout si vous êtes dans un match up AD, vous commencerez par une Armure d'étoffe et 4 potions. Si le match-up est AP, optez pour le bouclier de Doran. En mid-game, il sera important d'avoir le Revolver Hextech, le Sabre Vicié et les Protéges-Bras du savant. N'oubliez pas la paire de Bottes de Vitesse. Le core build s'articulera de la manière suivante : Tahj ninja, Pistoleme Hextech, Sabres de Zhonya et Sceptre Abyssal. Objets situationnels : Sandales de Mercure : à prendre si votre vis-à-vis à des dégâts majoritairement AP, et si la team ennemie à pas mal de CC's. Chaussures du Sorcier : si vous avez un gameplay très agressif, vous aurez un meilleur potentiel de kills mais une moins bonne résistance : Fléau de Liche : De mouvement speed en plus, des dégâts AP et surtout le passif de la Brillance qui peut permettre de mettre une bonne praline à votre adversaire. - Coiffe de Rabodon : Pas besoin d'expliquer ici : on maximise le plus possible les dégâts. - Bâton du Vide : De la pénétration magique en plus, donc des ennemis qui fondent plus rapidement. Il va la plupart du temps dans le core build : Cape Solaire : si vous souhaitez jouer Akali d'une façon un peu plus tanky contre un match-up AD, la Cape Solaire sera une bonne alternative. Si vous prenez les Cendres de Bami en early, cela améliorera votre cren. - Visage Spirituel : bon objet défensif sur le plan AP, en plus d'apporter des points de vie supplémentaire et un bon passif. - Ange Gardien : On ne le présente plus, cela améliore les deux défenses d'Akali, fanykant d'elle une menace encore plus importante pour la team adverse avec sa deuxième vie. On commencera par up le (E) qui sera votre sort principal de clear AD et AP en terme de farm et de dégâts également. On montera ensuite le (A) qui se combinera très bien avec l'ulti (R) grâce à la marque. On terminera par la zone de camouflage (Z). Pensez à mettre un point dans l'ultimate aux niveaux 6, 11 et 16 ! Akali peut surprendre en early game, mais elle n'a pas encore beaucoup de dégâts à ce moment là. Votre but sera de farmet, et de poke avec votre (A) si vous en avez la possibilité. Votre capacité de 1v1 sera la meilleure une fois arrivée au niveau 6 avec les dashes (R). Avant, il sera difficile de prendre un kill de par la faible mobilité. Avec un jungler à CC, vous pourrez tout de même espérer faire un kill ou au moins faire claquer un summoner spell. Votre (Z) vous confère une invisibilité qui vous permettra de temporiser en cas de gank ou alors pour éviter le poke de votre vis-à-vis. Vous effectuez un léger dash en sortant de votre (Z), ce peut être un bon timing pour agresser ! N'oubliez pas que malgré l'invisibilité, vous êtes très squishy et généralement, on aime pas vraiment les Akali fed. Le jungler viendra probablement pré-6 pour vous gank. Une fois votre Pistoleme récupéré et votre niveau 6, vous disposez d'un bon Powerspike qui peut éliminer les adversaires. Profitez de votre téléport pour décaler sur les autres lanes, ou faire un objectif majeur. Akali n'est pas le meilleur personnage splitpush à ce moment là de la partie, il sera donc bon d'aider vos alliés à gagner leur match-up pour ensuite dominer. Si vous avez déjà récupéré un ou deux kills par le passé, vous pourrez prendre des 1 contre 1 assez facilement. Vous aurez du sustain par vos objets et un potentiel de burst impression, en plus d'une mobilité conséquente. Akali a la capacité de snowball très rapidement, le moindre kill est peut vous faire filer la game rapidement. Si vous êtes fed, les ennemis devront se mettre à plusieurs sur vous, laissant ainsi vos alliés des opportunités d'objectifs comme les Dragons ou les tours. Il va falloir être très bon pour jouer cette Akali endgame. Comme tout Assassin, il ne faut pas en 1v5 pour essayer de tuer un carry. Vous restez assez squishy, et vous serez la cible principale pour l'équipe adverse. Analysez le terrain, voyez si votre équipe se fait engage et si vous avez une opportunité d'assassinat. Bien entendu, vous devez viser les carry dans un premier temps, quo'ils ne puissent pas prendre part au combat. Essayez de catch le plus possible. Contrairement à un toplaner assez Tanky où il but sera d'engage et de tanker la team, Akali devra saisir la seule chance qu'elle a pour empêcher que ses alliés subissent trop de dégâts. Avec Zhonya et la furtivité, vous pourrez temporiser tranquillement, et forcer les adversaires à s'éparpiller. En dehors des teamfights, vous avez le téléport, donc effectuez un travail de splitpush pour forcer une personne à être sur votre lane au moins. Cela dépendra de votre adversaire à ce moment là, mais vous pourrez prendre l'avantage sur ce dernier en le tuant, étant ainsi en supériorité numérique pour leur fight suivant.
